

PORTFOLIO.

Hello Everyone , I'am

IMAM ANWARUDIN

IoT Engineer & Web Developer

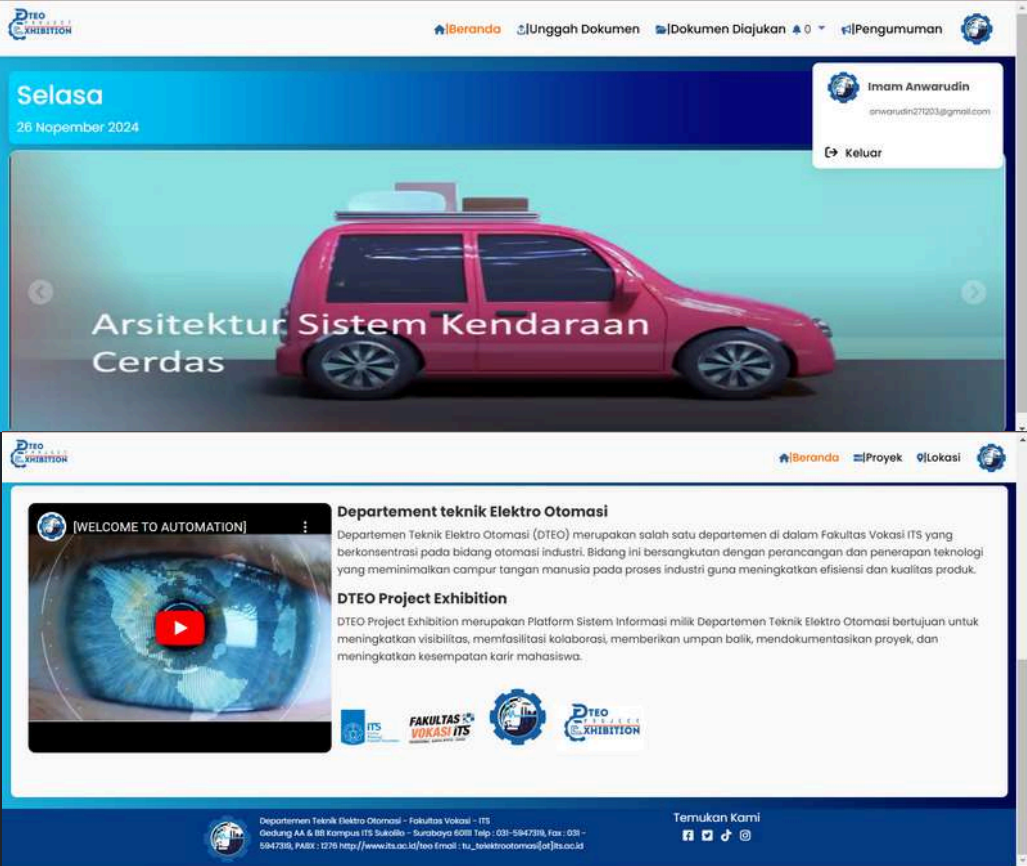

About Me

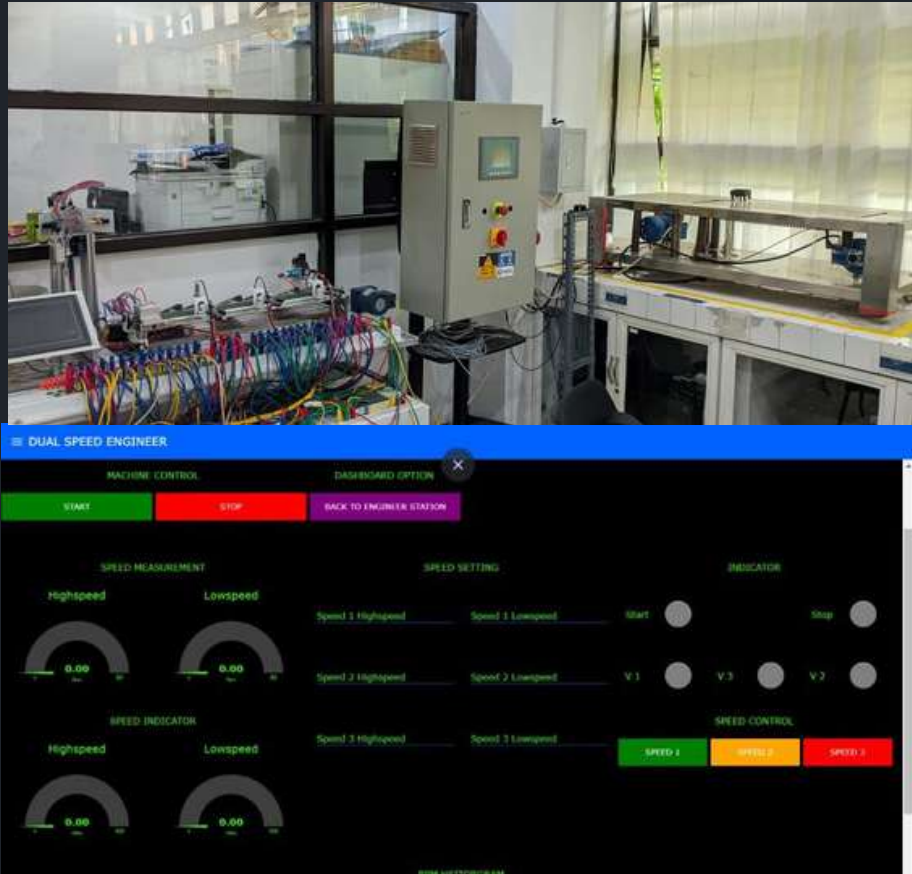

I am an Electrical Automation Engineering student in Sepuluh Nopember Institute Of Technology with expertise in web development, PLC programming, 3D design, and DCS and SCADA system monitoring. With a strong background in electrical engineering, I am capable of integrating efficient and innovative automation solutions. My skills in web development enable me to design intuitive and responsive user interfaces, while my knowledge of DCS and SCADA ensures reliable and secure monitoring systems. Additionally, my proficiency in PLC programming allows me to design and implement complex automated controls, and my experience in 3D design helps me create detailed and accurate models for various engineering projects. I am committed to continuous learning and contributing to the advancement of automation technology.

Education Background

Electrical Automation Engineering
Sepuluh Nopember Institute Of Technology

I've been a student since July 2022

Industrial Electronics Engineering
SMKN 1 Bandung Tulungagung

From July 2019 to July 2022

Personal Skills

During my education, I have learned and developed both my soft skills and hard skills to be well-prepared for working and contributing effectively to a company.

HARD SKILLS.

Programming Language

- c++
- HTML , CSS, JS

Hardware

- PLC
- DAQ
- Microcontroller

Communication Protocol

- HTTP
- MODBUS TCP IP
- API

Frameworks

- Bootstrap

3D Design Expert

- Autodesk Inventor
- Fussion 360

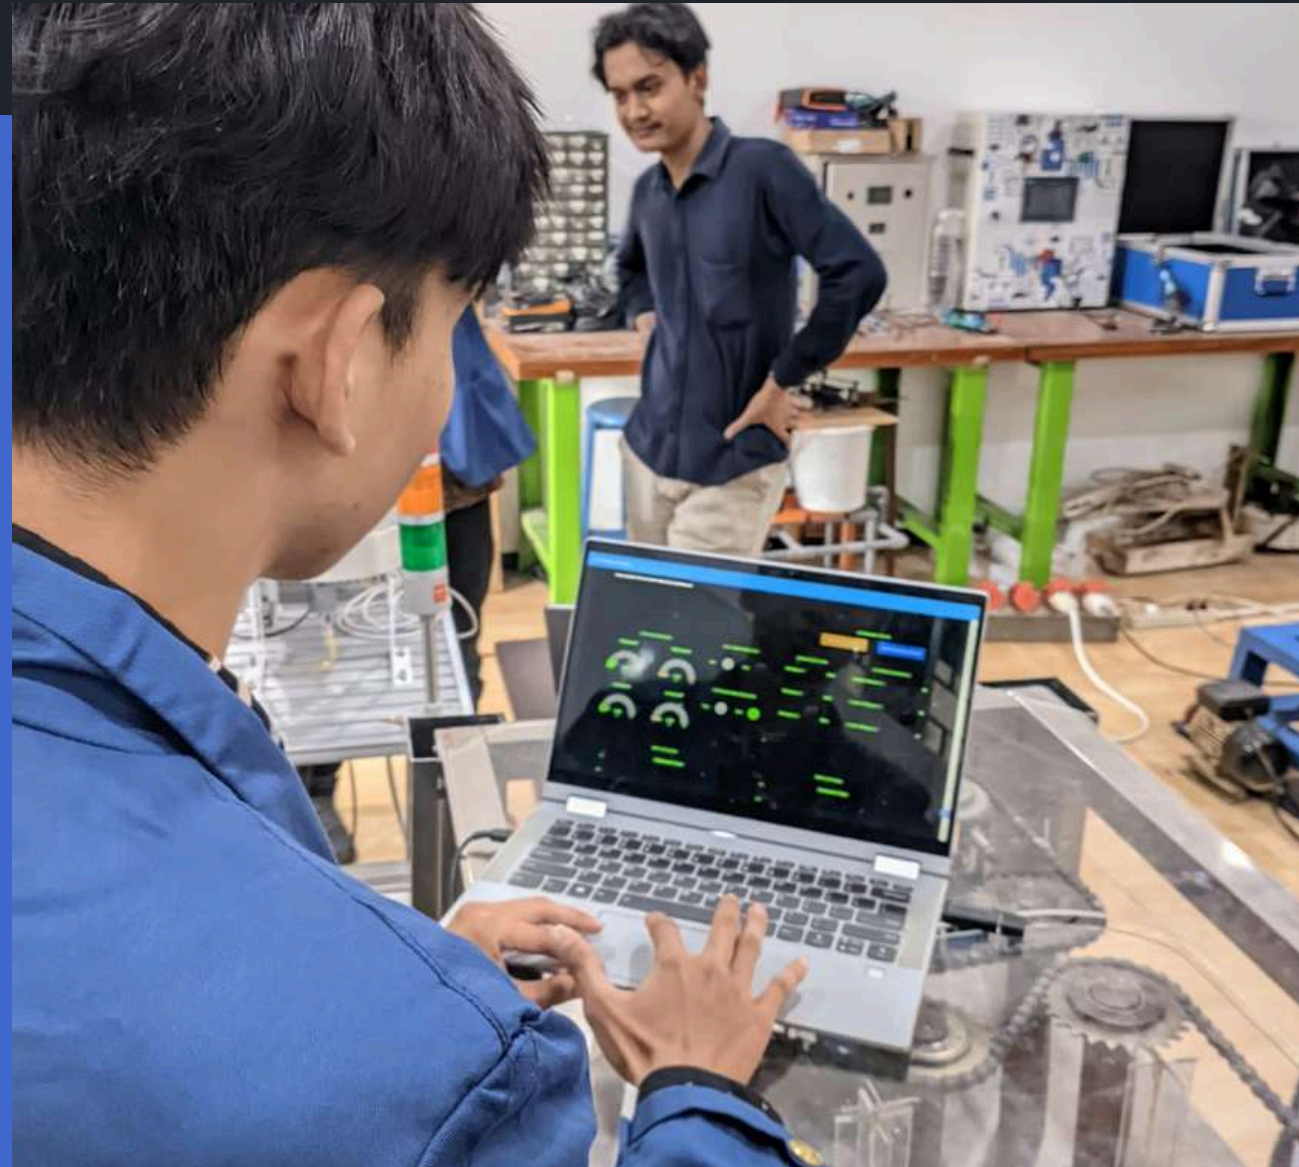

Electrical

- Electrical wiring and Instalation
- PCB Circuit Design

SOFT SKILLS.

- Critical Thingking
- Teamwork
- public Speaking
